## **Shower Enclosure Care & Maintenance**

Squeegeeing the glass frequently, then drying with a soft cloth is highly recommended. Using a squeegee after each shower helps keep spots and scale from accumulating on glass components. You should avoid abrasives, bleach, acidic or vinegar-based cleaners and scrubbing pads. Read labels on cleaning products thoroughly before using. Always ensure your squeegee is clean and in good condition or you can risk scratching the glass.

## **Shower Hardware**

You can permanently damage the metal's finish if improper cleaning compounds containing alkaline and phosphoric acids are used. The result can be the appearance of white spots and discoloration. Many products' labels warn against use on anodized and plated metals. Read labels on cleaning products thoroughly before using on your shower door.

## **General Disclaimer**

Consumers should understand that a shower enclosure is not watertight. The amount of water that can escape your shower can vary greatly based on shower/tub size, configuration of shower head(s), type of thresholds and drains and by the type of shower door itself. Heavy glass units with no or limited vinyl seals, for example, can allow water to escape under normal conditions. Excessive water pressure or directing shower heads or handheld sprays directly at doors or joints is not a normal shower conditions and can result in leaks. Improperly sealed tile grout can also allow for seepage under glass enclosures. Valley Glass is not responsible for any water damage outside of all shower enclosure or panels, including the shower door area. Additional seals can be purchased after use at the homeowner's expense.

## **Safety Disclaimer**

Frameless shower enclosures and enclosures with little to no hardware or support can be prone to breakage, movement, and leaks. Towel bars, handles and accessories are in no way considered to be grab bars or other bracing or fall prevention mechanisms. The intent of these accessories is to facilitate proper operation or enhance the esthetics and functionality of the unit.

## **Limited Warranty**

Shower door hinges, handles and clamps are warranted against material defects for (3) three years. This Warranty shall not cover or apply to normal wear and tear, glass breakage, tampering, neglect, or misuse of any kind. Any condition or damage resulting from incorrect or inadequate maintenance or care, including but not limited to maintaining silicone, vinyl joints and vinyl seals are not covered under this Warranty. Valley Glass' liability is limited to and shall not exceed the purchase price of the Product(s) purchased and will bear no other expense, such as labor cost of any kind. Valley Glass shall not be liable for any direct, indirect, special, incidental, or consequential damages whatsoever. Protection under this limited warranty is provided to the original homeowner only and is non-transferable to any subsequent homeowners who acquire title.
